

Web Design Questions

Good web site design begins by answering the following questions.

Who is the audience of the web site?

What is the web site about?

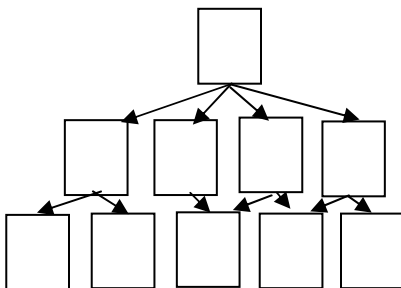

What is a two or three sentence mission (purpose) statement for the site?

What are the navigation links the site will need?

1. Home	8.
2. Bullying and Harassment	9.
3. Drugs and Alcohol	10.
4. Tobacco Usage	11.
5. Sexual Harassment	12.
6. Our Community	13.
7.	14.

What will the site map of the site look like?

Example:

Web Page Content

Use the answers to the following questions for your web content for the Safe School topic you choose: bullying and harassment, drugs and alcohol, tobacco usage, sexual harassment

- What is the definition of the topic words? Also give some examples of the problems they create. What does this topic mean to you? List some examples you have seen at school.
- What affect does this topic have on you and your school? Have you, your friends or family been affected in any way by the topic you selected?
- What are some facts about the topic as it affects your district or facts you find on the Internet? Each of your districts has completed a Healthy Youth Survey that has good information from your district. This information is probably available from your principal. You may also contact local agencies that have specific information about your district or community.
- What is your district doing to address this issue? Give examples of assemblies or programs that are in place and who can be contacted for more information. Be as specific as possible and even include handouts and presenter information.
- What are some things you can do to get out of a negative situation related to this topic? Provide practical examples of what someone could do if they are involved or know someone involved with the topic, i.e. recovery programs, etc. Where should they go to get help?
- What resources are there in your building, community and on the Internet to help students that are involved in this? Create a resource list in each of the categories (building, community and Internet). Provide phone number, address and web page address.
- Also include any other useful information you find.
